Solar electricity is growing rapidly, but can it really dominate the global energy system? Here is what it will take for us to power the planet on sunshine

Twenty four states are now considering legislation to allow small, plug-in solar power systems that connect directly into a wall socket. In Mississippi, neighbors of a Chevron plant worry that...

In a 2023 Pew Research Center survey, 7% of homeowners said they have installed solar panels on their home; an additional 28% said they were seriously considering it. Westerners ...

Solar Energy Information. Read the latest news and techniques for efficient solar photovoltaic power, new solar energy systems and more.

Worldwide solar and wind power generation has outpaced electricity demand this year, and for the first time on record, renewable energies combined generated more power than coal, according to a new ...

A ray of good news: this summer, the sun is generating record-breaking quantities of electricity--steadily displacing energy production from coal, oil, and gas, which are the leading ...

BEIJING, Jan. 28 (Xinhua) -- China's solar power sector saw steady expansion in 2025, contributing significantly to the growth of the nation's overall power generation capacity, according to data ...

Scholars have explored factors influencing its adoption and proposed measures to foster its development. This paper systematically reviews the literature on factors influencing the adoption ...

This report unpacks the concept of 24-hour electricity supply with solar generation -- how solar panels, paired with batteries, can deliver clean, reliable electricity around the clock.
