Ke Yan Li is a director who currently holds positions at Hubei Huaguang New Materials Co. Ltd., Yunnan Tianda Photovoltaic Co. Ltd., and Sicong Opto-Electronic Ltd. Mr. Li previously held a director ...

In this report we demonstrate a new and versatile photovoltaic panel cooling strategy that employs a sorption-based atmospheric water harvester as an effective cooling component.

Li et al. conducted experiments using a climate model to show that the installation of large-scale wind and solar power generation facilities in the Sahara could cause more local rainfall, ...

earliest publicly available datasets for photovoltaic panel extraction in RS imagery. It aims to provide a standard data foundation for applying advanced deep learning technology to photovoltaic panel ex-tract

The groundbreaking hydrogel cooling technology was developed by a PolyU team led by Prof. YAN Jinyue Jerry, Chair Professor of Energy and Buildings, together with Dr LIU Junwei, ...

This research introduces a method that enhances PV panel segmentation by employing the enhanced Segment Anything Model, which has been extensively pre-trained using a comprehensive real-world ...

Completion Time,D-dimensional Vector,Duration Of Work,Electrical Equipment,Electricity Consumption,Electricity Usage,Household Appliances,Household Electricity,Household ...

With the rapid development of the photovoltaic (PV) industry, the collection and recycling of end-of-life PV modules is facing a new challenge. Based on the EPR principle (Extended Producer...

Using MODIS data, we quantified the effects of solar farms (SFs) on albedo, vegetation (using enhanced vegetation index (EVI) as a proxy), and land surface temperature (LST) based on ...
