The invention belongs to the technical field of photovoltaic supports, and particularly relates to a production process of a solar photovoltaic support.

The bracket production list includes the total number of sets of brackets, the model and quantity of each bracket, the model and quantity of bolts, and auxiliary materials such as spring washers, flat ...

Fixed photovoltaic brackets are supports that allow photovoltaic arrays to receive solar radiation at a fixed angle.

Photovoltaic brackets are a vital component of a solar power system. They carry solar panels, ensuring that they are stably installed on the roof or on the ground, maximizing the absorption of solar energy ...

Kinsend needs to go through strict process review and production inspection for each photovoltaic support project, the following will take you to ...

The last step in the mechanized production of photovoltaic brackets is for the robot arm to clamp the already produced brackets away from the production line...

Production Line. Guoqiang singsun has gradually formed a complete PV mounting industry chain of high-end raw material manufacturing, PV mounting processing, hot-dip galvanizing ...

It features high production speed, intelligent PLC control, and extreme flexibility to produce various profiles. The entire line requires only one operator, significantly reducing labor costs.

Bending and forming: Use special bending machinery to process the steel to present the shape and angle required by the photovoltaic bracket. Drilling and welding: Precise drilling and ...
