Power Query code to refer to another query (and how buffering works) Ask Question Asked 1 year, 4 months ago Modified 1 year, 4 months ago

But in Power Automate, if I use the "Send an HTTP Request" action (under "Office 365 Outlook") and send a request to that same endpoint, it returns a lot of the message information but ...

I use Power Automate to collect responses from a Form and send emails based on the responses. The main objective is to automate decision-making using Python to approve or reject the ...

Extract Value from Array in Power Automate Asked 1 year, 3 months ago Modified 11 months ago Viewed 7k times

I am writing a Power automate to copy emails from an Outlook mailbox to SharePoint. I am using Get emails (V3) and want to retrieve emails received on a particular date.

Send an HTTP request to SharePoint action in Power automate flows works with SharePoint REST APIs. Follow below Microsoft official documentations for SharePoint REST API ...

You are confusing Power Automate with Power Automate Desktop. The link you provide is for Power Automate, so those functions won't work in the PADesktop. There is an action named ...

In Power Automate, within the Power BI connector, you'll find the "Run a query against a dataset" action. Take note: this can only return one table at a time with max of 1,000 rows.

Thank you. Yes, according to the video referred I did an app registration in Entra using an admin account. I have an access token with id and secret. But as I was not able to find any option to ...
