DEPT OF DEFENSE United States has Released a tender for Construction Services Of A Power Generation Microgrid At Cape Cod Space Force Station In Bourne, Ma in Infrastructure and ...

The Cape Cod Space Force Station (CCSFS) is an active-duty military installation that houses ground-based radar systems essential for National Security.

The Power Generation Microgrid project will be constructed within the grounds of CCSFS in facilities which are in restricted areas requiring enhanced security protocols.

The project involves the construction of two tubular steel canopy structures to support photovoltaic solar panels, installation of an integrated gutter and stormwater drainage system, a ...

This is a military construction project included in the Energy Resiliency and Conservation Investment Program (ERCIP) targeted for issuing the construction solicitation this Winter.

Other major features of the project include the complete replacement of all facility systems located in the onsite power generation plant, providing new back-up power assets with ...
