Traditional solar mounting methods require drilling multiple holes into your roof, creating several potential problems. These penetrations can lead to water leaks ...

Enter photovoltaic brackets without holes, the game-changer that's making contractors breathe easier and roofs stay drier. These innovative mounting systems are flipping the script on solar installation, ...

Discover how to attach solar panels to metal, tile & flat roofs without drilling holes. Explore ballasted, clamp-on solutions that protect roof integrity. Certified for ...

Solarpod Z-Rack - Aerodynamic Solar MountingS:Flex Flat Direct - Weighted Solar MountingBallasted MountsPlates Or ConcreteMetal TrussesYou can install solar panels on a flat roof using heavy metal plates or concrete to hold the array in place, again provided they are permitted by your building codes. Like other types of ballasts, metal and concrete are quite heavy, so you need to be sure your roof can handle them.See more on solvoltaics
