Designing intelligent economic dispatching strategies for microgrids; however, it is drastically different from that for conventional central grids due to two unique challenges. First, the ...

This study proposes an optimized day-ahead economic dispatch framework for wind-integrated microgrids, combining energy storage systems with a hybrid demand response (DR) strategy ...

In order to maximize the utilization of renewable energy, enhance its utilization efficiency, and reduce the carbon emission of power supply, this paper first proposes a real ...

This article proposes an economic dispatch strategy for power systems that considers the priority of multiple types of load responses in response to the challenges posed ...

Driven by the growing separation of investment and operation in the emerging electricity-market context, the conventional single-agent, peak-valley arbitrage paradigm for microgrid dispatch ...

To address these issues, this paper proposes a Multi-Factor Oriented Model strategy (MOM strategy) and improved bald eagle search (BES) algorithm to optimize the multi ...

Article Open access Published: 23 February 2026 Sustainable sizing, dispatch, and resilience planning of hybrid microgrids using Arctic Puffin Optimization Ahmed H. Yakout, Amr ...

To fill in the existing research gaps identified above, this paper discusses a two-stage microgrid dispatching framework with an improved ...

This paper proposes a multi-strategy fusion slime mould algorithm (MFSMA) to tackle the microgrid optimal dispatching problem. ...

Research on microgrid dispatching strategy
