The information developed through this EOI will be used to evaluate the market interest for IPP-led development of renewable energy generation and storage for Samoa, to be procured by EPC.

Samoa, a Pacific island nation, is embracing wind power energy storage projects to reduce fossil fuel dependence and achieve its 100% renewable energy goals by 2025. This article explores ...

04 Phase change material systems for solar energy storage PCM-based systems can be integrated with solar energy collection devices to store excess thermal energy for later ...

The main objective of this task was to assess the interest and cost-effectiveness of the energy storage systems, and the role that it can perform as grid support including identification and ...

The objective of this paper is to review the recent technologies of thermal energy storage (TES) using phase change materials (PCM) for various applications, particularly concentrated solar ...

Summary: Explore how Samoa's innovative 2MW hybrid renewable energy project combines wind, solar, and advanced battery storage to achieve energy independence. Discover its ...

The initiative will involve the expansion of solar farms, battery storage systems, and energy efficiency programs to support domestic and ...

The primary purpose of this report is to document Samoa's energy history, offer insights into past and present energy supply and demand, and support evidence-based policymaking.

Whether you're an energy wont, a sunburnt tourist, or just someone who appreciates not breathing diesel fumes, this Pacific pioneer proves one thing: the future of ...
