Find up-to-date statistics and facts on the solar photovoltaic industry in the United States.

In 2024, between 554 GWdc and 602 GWdc of PV were added globally, bringing the cumulative installed capacity to 2.2 TWdc. China continued to dominate the global market, ...

The report provides an overview of the Global Solar PV industry, with insights on prevailing market conditions, recent trends, drivers, challenges, and outlook in major countries across Europe and the ...

With forecasts up to 2029 and a spotlight on India -- now the world's third-largest solar market -- the report outlines critical challenges and solutions for sustaining growth, from policy ...

Rising global concerns regarding climate change, increased emphasis on sustainable and clean energy solutions, favorable government policies and ...

Photovoltaic (PV) solar accounted for 58% of all new electricity-generating capacity additions through the third quarter of 2025, remaining the dominant form of new electricity-generating ...

Prices for silicon stabilized around \$20 per kilogram and the booming solar PV market helped to reduce the enormous global overcapacity from 2009 onwards. ...

The solar photovoltaic market size crossed USD 323.5 billion in 2025 and is expected to grow at a CAGR of 8.1% from 2026 to 2035, driven by integration of ...

The IEA PVPS Trends in Photovoltaic Applications 2025 report provides comprehensive data and analysis on global PV deployment, technology, and ...
