This report summarizes the latest statistics on solar power capacity by state and highlights the top U.S. states in solar power generation.

As seen in Table 3.7, solar is the leading resource for proposed and pending application generation capacity, with wind making up most of the remaining capacity.

Capacity and Generation by State | Energy Markets & Planning. Skip to main content . Berkeley Lab. Energy Technologies Area. Energy Analysis Division. Research Areas+. Distributed Energy & ...

Data about the electric power generated in the United States. The data includes air emissions for nitrogen oxides, sulfur dioxide, carbon dioxide, methane, and nitrous oxide; emissions ...

California leads as the top solar state. With over 54 GW of solar installed, enough energy to power over 15 million homes. Texas has the fastest growing solar economy with the largest utility-scale solar and ...

A total of 252 distributed solar policy actions were taken during Q2 2025, with the most actions taken in Colorado, Connecticut, Virginia, Minnesota, New York, and New Jersey.

Year-end wrap-up Following 35% growth, solar has passed hydro on US grid Coal makes a bit of a comeback, if only by accident.

This is a list of U.S. states by total electricity generation, percent of generation that is renewable, total renewable generation, percent of total domestic renewable generation, and carbon intensity in 2024. The largest renewable electricity source was wind, which has exceeded hydro since 2019.

Much of the utility-scale solar generation capacity additions will come online in Texas. We expect that solar electricity generation supplied to the grid managed by the Electric Reliability Council ...
