The raised structure of Anti-Slip walkway aids in drainage, preventing water or other liquids from pooling on the surface. This provides enhanced anti-slip effects, particularly suitable for wet environments or ...

Made with high-efficiency silicon cells, it integrates advanced photovoltaic technologies like BIPV to deliver reliable green energy solutions. Suitable for various global applications, it supports ...

The major reason is that the transmissivity of the tempered glass is reduced by the additional anti-slip surface, which means that the received solar radiation on solar cells is decreased.

Turkey-based Ankara Solar Energy launched its own brand of walkable PV flooring for residential and commercial projects. Its 30 W and 120 ...

High-efficiency 135W monocrystalline solar floor tile with anti-slip tempered glass surface and 25-year output warranty for sustainable energy generation.

MEGA Glass anti-slip glass flooring sets the standard for safety, strength, and bold design. Proudly made in the USA and trusted ...

Think of it like tire treads for solar panels - they increase friction without blocking sunlight. A 2023 NREL study showed these textures reduce slip accidents by 72% while maintaining 98% energy efficiency.

PV Floor provides both energy saving and an aesthetic solution with its innovative energy-generating solar panels used as floor covering. With its durable and ...

This innovative product line is crafted to provide an elegant solution for those seeking to enhance their spaces while prioritizing privacy and anti-slip features.
