We specialize in high-precision plastic moulds tailored for new energy applications, delivering robust and reliable solutions for components used in electric vehicles, solar energy systems, and energy storage ...

Our highly skilled team can work with you to design, develop, and manufacture plastic components that meet the specific requirements of your solar products, whether it's solar racks, mounting systems, or ...

Product Name:Rubber Parts;Mould material:P20, H13, S136, NAK80, 420, 718, 2738, SKD61, 2316;Surface treatment:Polishing,Sandblasting,Plasma Treatment,Acid Etching;Mould Life:P20 ...

FOW Mould is a highly-rated manufacturer of solar panel components. Providing several injection molding services, we offer one-stop solutions to all solar power ...

Using BMC molding in your solar inverter components ensures electrical safety, robust performance, and resistance to outdoor conditions. BMC ...

Specializing in PV inverter mold making with high-precision die casting & CNC machining for optimal thermal management and energy efficiency. Get expert manufacturing support today.

Custom-designed liquid cooling radiator components for ultra-fast EV charging stations and power electronics. Including plastic ...

Get a free mold enclosure for your project! TXH standard inverter enclosures are designed with precision and manufactured using high-grade materials. They ...

LightManufacturing's patented SRM (Solar Rotational Molding) process uses sun-tracking mirrors called heliostats, to concentrate solar energy on a rotational ...
