---

Scientists in China have developed a new way of harvesting solar power by applying a translucent coating over a window to direct energy from ...

Casso-Solar Technologies has extensive experience designing and providing equipment for the architectural glass industry and has been doing so since the early 1980's.

NorthGlass produces vacuum coating technologies and many other coating application units that are suitable for construction, automotive, photovoltaic and ...

Learn how inline magnetron sputtering coats large-area glass with ITO, Ag, and other materials for displays, solar panels, architectural glazing, and ...

Our solutions cater to major glass manufacturers and specialized producers. We emphasize precision, durability, and long-term performance, ensuring your investment yields significant returns.

Photovoltaic glass manufacturing is revolutionizing solar energy adoption worldwide. Whether you're a solar panel producer or a construction materials supplier, understanding the equipment for producing ...

Northglasshorizontal architectural coating machines mainly produce Low-E coated glass, solar-control glass, AR film, etc. by using magnetron sputtering method depositing different kinds of material on ...

Your single source: High-efficient float glass production, glass coating, glass processing as well as high-capacity production of flat solar mirrors. Everything is highly automated, precise and efficient.

HTL/Conductive Layer PVD Coating Equipment Features introduction Vertical sputtering with U turn, footprint reduction; Intelligent program management, real ...
