-----

Even in low-light conditions such as early mornings, overcast skies, or smog, HISG glass continues to generate power steadily, while also offering multiple features such as heat insulation, wind ...

Based in Denmark, Heliac has created solar panels that generate heat using lenses that focus sunlight exactly like magnifying glasses. This ...

Chinese scientists develop self-healing solar glass that can generate electricity while remaining transparent.

This system will allow the heating of water to steam temperature if required, and in size be a lot smaller than conventional solar hot water panels. It would be most efficient for the system to have a device ...

Photovoltaic smart glass converts ultraviolet and infrared to electricity while transmitting visible light, enabling sustainable daylighting.

SolarWindow Technologies, Inc. (Symbol:WNDW) is developing the first-of-their-kind electricity-generating see-through windows and products for America's 85 ...

Cadmium Telluride PV Glass (CdTe): A laminated double-glass pane coated with cadmium telluride solar cells, ideal for building facades. It reduces external heat ...

Scientists in China have developed a new way of harvesting solar power by applying a translucent coating over a window to direct energy from ...

To promote and respond to the concept of BIPVs, this study developed a type of multi-functional heat insulation solar glass (HISG) that differs from traditional transparent PV modules, ...
