-----

The continent of Africa looks set to emerge as a key driver of global solar power production over the rest of the 2020s thanks to a potent mix of policy support, rapid economic growth and ...

Africa is entering a new phase in its energy journey, with solar power taking center stage. After a record year of capacity additions in 2025, the continent is now moving toward what many ...

Africa's solar energy market continues to grow significantly. In 2025, the continent added more than 5,000 MW solar power capacity. In this article, we breakdown countries leading this drive.

Made up of 54 countries, Africa gets more sunshine hours than any other continent. It has some of the highest levels of solar irradiance -- the ...

In the sections that follow, we explore the top ten African solar markets in 2025, spotlighting countries that combine scale, growth momentum, supportive policy environments and ...

A report shows that Africa has emerged as the world's fastest-growing solar market even as global growth slowed last year, driven by a 60% surge in imports of solar panels from China.

A recent report by the Global Solar Council shows a region rapidly pivoting towards alternative power solutions. With limited legacy infrastructure, the African continent's connectivity ...

OverviewSolar potentialPay-as-you-go SolarSolar photovoltaicsSolar thermal powerSee alsoAfrica is often considered and referred as the 'Sun continent' or the continent where the Sun's influence is the greatest. According to the 'World Sunshine Map', Africa receives many more hours of bright sunshine during the course of the year than any other continent of the Earth: and many of the sunniest countries on the planet are in Africa.

As global efforts intensify to triple renewable energy capacity by 2030, Africa's role in achieving this target is
