Wind and solar power generated more than a third of Brazil's electricity in August. This marks the first time these renewable sources have ...

Brazil accounts for only 27% of solar capacity that is currently operating or under construction in Latin America, but 65% of the capacity in the ...

In Brazil, solar photovoltaic dominates the distributed generation sector, representing 99% of the country's total distributed generation capacity. Small hydroelectric and wind account for ...

Brazil isn't just embracing solar energy--it's revolutionizing its potential in the global energy sector. As we count down to the Solar World ...

Brazil is expected to add 13.2 GW of solar capacity in 2025, but the market is showing early signs of slowing as new large-scale projects face delays and distributed generation encounters...

In 2020, the country's installed solar PV capacity stood at 8.5 gigawatts. By the end of 2024, this had grown to roughly 53 gigawatts. The ...

Utility scale solar energy in Brazil reached 16.4 GW, while distributed generation from solar accounted for 34 GW in 2024. Investments in utility-scale solar energy projects that have ...

Solar energy in Brazil surpassed the 55 GW milestone in March 2025, more than doubling its photovoltaic (PV) count in the last few years. That breakneck expansion is reshaping Brazil's energy ...

The expansion of distributed solar generation significantly contributes to the diversification of Brazil's energy matrix. According to data from ...
