With the P500E, you can transfer energy bi-directionally to the battery, grid and DG, helping you to achieve more functionality and maximise the benefits of your energy storage system.

To meet growing energy needs, Sri Lanka will need to look beyond publicly financed projects and increase the share of commercial financing and encourage greater private sector participation.

With Sri Lanka's energy demand growing at 5.2% annually (CEB Report 2023), liquid cooling energy storage cabinets have emerged as game-changers. These systems address two critical challenges:

Based on an extensive evaluation of various energy storage technologies, four (4) key solutions have been identified as the most suitable options for Sri Lanka which can be implemented over the next ...

Energynet has been keenly associated with the UPS industry in Sri Lanka for more than 35 years, providing dependable and sustainable power solutions to mission ...
