Published: January 16, 2026 In its 2026 list of "10 Breakthrough Technologies," MIT Technology Review named the sodium-ion battery as a key technology shaping the future of global energy infrastructure. ...

The company provides first-class solutions and services for global new energy storage applications by integrating industry superior resources and combining ...

While many lithium-ion battery manufacturers in China are sold out and struggling to keep pace with demand from the energy storage sector, ...

The Fulin sodium-ion battery energy storage station in Nanning, Guangxi, as China's first large-capacity sodium-ion battery energy storage station, put its Phase II expansion project into ...

The first phase was China's first large-scale power equipment project in Africa and marked HE's initial venture into the African power market. The ...

Its capacity will eventually be doubled to 100MW/200MWh, but is almost certain to already be the largest sodium-ion project in the world, as ...

The project represents the first phase of the Datang Hubei Sodium Ion New Energy Storage Power Station, which consists of 42 battery energy storage ...

In a bid to diversify from lithium, China has been exploring alternative energy storage technologies. Sodium-ion batteries have emerged as a promising option due to their abundant raw ...

While lithium dominated 87% of 2023's battery market, sodium-based solutions now claim 18.5% annual growth - the fastest in energy storage history [7]. But what's driving this shift, and how is China ...
