Support CleanTechnica's work through a Substack subscription or on Stripe. The energy debate in Washington is loud and partisan. Despite the anti-clean energy rhetoric coming from this ...

Almost 70 gigawatts (GW) of new solar generating capacity projects are scheduled to come online in 2026 and 2027, which represents a 49% increase in U.S. solar operating capacity ...

In 2024, 93% of all new electricity generating capacity was wind, solar or energy storage, and the U.S. Energy Information Administration ...

To pick the best solar generators, we tested some of these power stations for charging capacity, ease of use, weight, and different use cases. ...

Solar technologies convert sunlight into electrical energy either through photovoltaic (PV) panels or through mirrors that concentrate solar radiation. This energy can be used to generate electricity or be ...

Learn how to generate solar energy at home and earn credits for the electricity you produce. Explore SCE's billing plans, rebates for battery storage, and ways to share solar benefits across accounts.

In this context, this paper critically analyses the diverse strategies and advanced trends for acquiring grid support services from solar photovoltaic power plants. The relevant procedures are ...

A new analysis of social media posts finds that public support for solar energy remains high, though that support declined significantly from 2016 ...

From farms and factories to churches and schools, solar is powering the lives of Americans. See how abundant, affordable, reliable solar power is rising to meet ...
