Today, Skysun builds various suspended solar energy generation systems, ranging from the hammock-like Skysun Solar Pollinator to full-sized solar pergolas that provide ...

This innovation is in line with global energy trends that prioritize clean, renewable sources such as solar energy. Also referred to as solar wing systems or tracking photovoltaic ...

Lumos solar canopies, awnings, and walkways use bifacial panels that collect sunlight from both the front and back. This ...

The key to frequency and spacing of attachment points for PV is to distribute loads to the metal standing seam panels in a ...

This invention relates generally to the mounting and securing of solar energy collectors such as photovoltaic panels, and more particularly to an above surface/ground mounting system that...

Suspended solar panels are designed to hang or float above the ground, allowing for better light absorption and increased energy production. By suspending the panels, they ...

The initial product, Solar Pollinator, is designed to be suspended over plants that thrive in partial shade. Like a concentrator, the panels can track the ...
