Thailand may lack the Battery Energy Storage Systems (BESS) necessary to navigate supply and demand challenges. The 2024 PDP draft included 10,000 MW of BESS, but this may see ...

The Electricity Generating Authority of Thailand (Egat) plans to convert three hydropower dams into massive energy storage systems with a 90-billion ...

Although Thailand is a regional leader in renewable energy, its use of energy storage is nascent. EGAT undertook some studies on the potential for energy storage and is piloting three battery energy ...

The increased solar and energy storage targets could sustain the forecasted electricity demand increase from data centres and EV charging in the ...

Search all the announced and upcoming battery energy storage system (BESS) projects, bids, RFPs, ICBs, tenders, government contracts, and awards in Thailand with our comprehensive online database.

Energy storage is in its infancy in Thailand, and new business models are already emerging. As the regulatory framework adapts to accommodate new players in the market, we ...

This project will leverage existing infrastructure at Arthit field while constructing and installing additional facilities as required. Once operational, its capacity will gradually ramp up to ...

The Asian Development Bank (ADB) has approved a \$350 million loan to Gulf Renewable Energy to build 194 MW of solar capacity, including two battery-integrated projects, in ...

The project was delivered on schedule and entered commercial operation by December 31, 2024--demonstrating the ETS team's customer-first mindset and strong end-to-end project execution ...
