The first in the UK to construct, own and operate grid scale batteries. We apply our experience to make renewable power work for everyone. Our platform of large ...

However, within the UK, numerous sites over 1GWh in size have already been approved and construction has begun on some of these sites that ...

We've successfully connected the UK's largest battery energy storage system (BESS) to our transmission network.

Following energisation, the facility in North Yorkshire is the UK's largest transmission connected battery energy storage system (BESS). The facility is ...

Since 2000, Powersystems has connected over 10 GW of renewable energy to the UK grid, including onshore and offshore wind, solar, hydro, tidal, and battery energy storage systems (BESS). ...

This post investigates the state of the UK battery storage pipeline, year-to-date figures and an insight into the appetite to develop over time. ...

Through vehicle-to-grid (V2G) technology, EVs can act as distributed energy storage units that supply power back to the grid when needed. By 2050, ...

Statera Energy has begun operating the biggest BESS project in the UK, connected to a National Grid substation that formerly supported two coal power plants.

National Grid has energised what is being billed as the UK's largest battery energy storage system (BESS), connecting the 300MW Thurrock ...
