This observation is reinforced by the results of this year's marginal cost analysis, which shows an increasing price competitiveness of existing gas-fired generation as compared to new-build ...

In the United States, new battery energy storage systems and nuclear plants starting operations in 2030 had the highest estimated levelized ...

Clean Energy February 18, 2026 New York, February 18, 2026 - Clean power costs sent mixed signals in 2025. According to BloombergNEF's Levelized Cost of Electricity 2026 report, the cost of battery ...

Each quarter, new industry data is compiled into this report to provide the most comprehensive, timely analysis of energy storage in the US. All forecasts are from Wood Mackenzie Power & Renewables; ...

The US energy storage monitor is a quarterly publication of Wood Mackenzie Power & Renewables and the American Clean Power Association. Each ...

The assessment adds zinc batteries, thermal energy storage, and gravitational energy storage. The 2020 Cost and Performance Assessment provided the ...

DOE's Energy Storage Grand Challenge supports detailed cost and performance analysis for a variety of energy storage technologies to accelerate their ...

While early adopters continue leading in deployment, activity across the country shows clear demand for utility-scale ...

In this work we describe the development of cost and performance projections for utility-scale lithium-ion battery systems, with a focus on 4-hour duration systems. The projections are developed from an ...
