The US Energy Storage Monitor is a quarterly publication of Wood Mackenzie Power & Renewables and the American Clean Power Association (ACP). Each quarter, new industry data is compiled into this ...

With fluctuating energy prices and the growing urgency of sustainability goals, commercial battery energy storage has become an increasingly attractive energy storage solution for ...

Each quarter, we gather data on US energy storage deployments, prices, policies, regulations and business models. We compile this information into this report, which is intended to provide the most ...

Prices are expected to increase nominally in 2025, as shown in the chart above, before jumping more substantially in 2026. That larger increase is primarily down to new tariffs imposed by ...

This chapter, including a pricing survey, provides the industry with a standardized energy storage system pricing benchmark so these customers can discover comparable prices at different market ...

Additional storage technologies will be added as representative cost and performance metrics are verified. The interactive figure below presents results on the total installed ESS cost ranges by ...

In this work we describe the development of cost and performance projections for utility-scale lithium-ion battery systems, with a focus on 4-hour duration systems. The projections are developed from an ...

The following resources provide information on a broad range of storage technologies.

From stabilizing power grids to enabling emission-free transportation, electrical energy storage equipment is rewriting the rules of energy management. With prices at historic lows and innovation ...
