---

Whether you need residential photovoltaic storage, commercial BESS systems, industrial energy storage, mobile power containers, or utility-scale photovoltaic projects, WALMER ENERGY has the ...

These three parts form a microgrid, using photovoltaic power generation to store electricity in the energy storage battery. When needed, the ...

The Australian Capacity Investment Scheme (CIS) is set to bolster energy storage capabilities in Victoria and South Australia with support for six ...

Victoria is the home of big batteries and has legislated storage targets of at least 2.6 GW by 2030 and 6.3 GW by 2035 to provide crucial support for more renewable capacity.

Technological advancements are dramatically improving solar storage container performance while reducing costs. Next-generation thermal management systems maintain optimal operating ...

Whether in metropolitan areas or remote sites, our expert teams handle every step--from container placement to system commissioning--so you can start ...

By 2035, at least 6.3 GW of new short and long-duration storage will be in place, supported by targeted gas-fired power generation to ensure electricity supply in periods of peak ...

As global electricity demand grows 3% annually (IEA 2023), Victoria's manufacturers are answering the call with cutting-edge storage solutions that act like a 'giant battery for the grid'. From solar farms to ...

Victoria says it is back on track for its renewables and storage targets after a rebound in wind and solar generation in latest year.
