There are several codes that impact when and where you need fall protection because you've installed solar panels. The International Fire Code (IFC) is most ...

An emerging trend in home solar energy is mounting solar panels vertically on fences and boundary walls. This ingenious approach capitalises on ...

To mitigate these risks, Cal/OSHA requires fall protection for those working at elevations of seven-and-a-half feet or higher. Fall protection comes in the form ...

ICC Digital Codes is the largest provider of model codes, custom codes and standards used worldwide to construct safe, sustainable, affordable and resilient ...

In the quest for optimal worker safety during solar panel installation, three main methods of fall protection emerge as essential: guardrail systems, safety net systems, and personal fall arrest ...

Workers who install and/or maintain solar panels often work on roofs, use ladders and scaffolding, are in proximity of ledges and sunroofs, and are exposed to fall hazards.

Our experts design innovative photovoltaic structures adapted to any type of wall, with zero inclination and portrait or landscape orientation. This design preserves ...

Design, manufacture, and installation of engineered, OSHA compliant fall protection systems for solar power applications.

This comprehensive guide outlines the structural requirements for solar panels and provides an overview on the inner workings of the installation ...
