solar panel is a device that converts sunlight into electricity by using multiple solar modules that consist of
photovoltaic (PV) cells. PV cells are made of materials that produce excited electrons when exposed to light.
These electrons flow through a circuit and produce direct current electricity, which can be used to power
various devices or be stored in batteries. Solar panels can be known a...
```

Solar panels convert sunlight into electricity through a process called the photovoltaic effect. In this process, sunlight charges the electrons in a ...
