---

West Boylston Municipal Light Plant (WBMLP) has installed a flywheel energy storage system (FESS), the first long-duration flywheel in the Northeast. The flywheel began operating on January 1, 2019.

Energy storage solutions, like Helix's flywheel technology, are needed to fill the gap between energy generating and energy consuming equipment.

After I wrote last week about a company developing power grid electrical storage systems using lithium-ion battery technology, a reader alerted me to another, very different approach for ...

Explore real-world examples and case studies of flywheel energy storage in renewable energy systems, and learn from the successes and challenges of implementing this technology.

Our industrial-scale modules provide 2 MW of power and can store up to 100 kWh of energy each, and can be combined to meet a project of any scale. Electric ...

Beacon Power, LLC is an American limited liability company and wholly owned subsidiary of RGA Investments LLC. Founded in 1997 and headquartered in Tyngsboro, Massachusetts, it specializes in flywheel-based energy storage. Beacon designs and develops products aimed at utility frequency regulation for power grid operations.

In this paper, state-of-the-art and future opportunities for flywheel energy storage systems are reviewed. The FESS technology is an interdisciplinary, complex subject that involves electrical, ...

By providing multiple cycles of kinetic energy without chemical degradation, our flywheels are uniquely suited to support the transition from fossil fuels to ...
