16 To change the size of (almost) all text elements, in one place, and synchronously, `rel()` is quite efficient: `g+theme(text = element_text(size=rel(3.5)))` You might want to tweak the number a bit, to get ...

`numpy.dtype` size changed, may indicate binary incompatibility. Expected 96 from C header, got 88 from PyObject Ask Question Asked 1 year, 8 months ago Modified 3 months ago

The OP was asking "Array.size () vs Array.length". From the previous discussions, it was make clear, that the "size" Function is not part of standard JavaScript but implemented by libraries. ...

In several C++ examples I see a use of the type `size_t` where I would have used a simple `int`. What's the difference, and why `size_t` should be better?

I found two ways to determine how many elements are in a variable... I always get the same values for `len ()` and `size ()`. Is there a difference? Could `size ()` have come with an imported ...

29 Making a powerpoint that's supposed to show a before and after of a website. Since it's currently a long website I'd rather make a single long slide to put it on (20" instead of 7.5"). But all the ...

An individual process in an OS might only be allowed to reserve up to 4GB RAM or less, which means `size_t` would only need to be 32-bit while pointers are 64-bit. 32-bit wide `size_t` wouldn't necessarily ...

If the size of the `int` is that important one can use `int16_t`, `int32_t` and `int64_t` (need the `iostream` include for that if I remember correctly). What's nice about this that `int64_t` should not have issues on a 32bit ...

What is the difference between `.size()` and `.length` ? Is `.size()` only for arraylists and `.length` only for arrays?
