First established in 2020 and founded on EPRI's mission of advancing safe, reliable, affordable, and clean energy for society, the Energy ...

Germany's energy storage market growth will be hampered by a regulatory decision to potentially charge utility-scale project operators fees for use of the grid, ...

The United States installed approximately 14.1 gigawatt (GW)-hours (4.3 GW alternating current [GW ac]) of energy storage onto the electric grid in ...

In 2025 there was just 2 GW of battery storage capacity installed, but by 2023 this grew to 89 GW - an increase of 4,350%, the UN report says. The ...

"Each phase of the study has indicated a potential coming wave of energy storage, with U.S. installed storage capacity increasing by at least five times by 2050," said Nate Blair, principal ...

In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already achieved record growth in 2024 ...

Latest news on energy storage projects, BESS, capacity expansion, and regulatory updates across Europe, US & Canada, Latin America, and Asia Pacific. Discover how energy ...

In its new whitepaper, the U.S. solar trade body has unveiled a vision for 700 GWh of energy storage by 2030, including an ambitious target to ...

In late afternoon, when the sun stops hitting solar panels and people are home using electricity, batteries now push stored solar energy onto the grid. ...
