A federal stop-work order has paused construction on the Vineyard Wind 1 project and four other East Coast offshore wind farms.

BarberWind Turbines 800kW land-based prototype is under construction in Concordia, Kansas. The BarberWind Turbines 800kW is designed to serve the Distributed Wind/mid-wind market. ...

Through an exploration of the evolution from traditional materials to cutting-edge composites, the paper highlights how these ...

Wind turbine blades are particularly sensitive to this issue: these components are made of different materials and sub-components, often difficult to separate, segment and ...

Wind turbines work on a simple principle: instead of using electricity to make wind--like a fan--wind turbines use wind to ...

Construction is underway on a pilot site to test wind turbines designed for faster, cheaper, and more efficient energy generation.

Researchers in Korea have developed a new design platform -- and a staggering 12-megawatt-class blade to match -- in an effort to ...

In addition to the blades, design of a complete wind power system must also address the hub, controls, generator, supporting structure and foundation. ...
